### **DETAILED ACTION**

It is noted that Claims 17-23 are directed to non-statutory subject matter and are not specifically grouped with either Group I or Group II as it is not clear whether they are product or process claims. Claims 17-23 will be subjected to a rejection under 35 U.S.C. 101 if not amended.

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4, drawn to a powder food product, classified in class 426, subclass 580.
- II. Claims 5-16 and 24, drawn to a process for obtaining a powder food product, classified in class 426, subclass 580.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
